## WPPP Nature Center

This spring the children will be able to enjoy our new Nature Center. They will have many opportunities to plant flowers, plants and seeds, observe the outside world and do a variety of art projects and other activities that will connect them to nature. The boy scouts plan to complete the building of tables, nature panels, and other activities in April.

"Studies show outdoor time helps children grow lean and strong, enhances imaginations and attention spans, decreases aggression, and boosts classroom performance. In addition, children who spend time in nature regularly are shown to become better stewards of the environment"
